

Seeds and Soil Matthew 13:1-9

Into the Lesson:

What is your favorite season of the year (after flash flood and wildfire season of course)? And why (hunting and football seasons don't count)?

How do you feel about so much agricultural land getting plowed under to "pave paradise and put up a parking lot"?

How do you think the farmers and ranchers feel?

Into the Word:

Read Matthew 13:1-9; 18-23 and consider the following questions:

From a simple logistical perspective, what does Jesus' locating himself in a boat, with a large group of people gathered around Him seem to say about his teaching/preaching style?

Although the disciples wanted to know why He spoke in parables, how familiar would the crowd be of the situation He was describing?

Review the four soil types and the results of the seeds sown:

Soil-

Into Life:

In his sermon, Lon mentioned, "...as the sower finds different types of soil, the Gospel finds different types of people and maybe the same person in different stages of life".

How can we identify those we meet, in regard to how they respond to the Gospel?

Those who are:

Beaten down on the road of life

Others who are experiencing a rocky life -

Those dealing with the thorny issues in their lives -

And hopefully those who have "fallen in the good soil".

How can we begin to "cultivate" those we encounter on a daily basis to encourage their growth?

Realizing our own "soil situation" can be a part of the season of life, how important is it to be continually "cultivated" in our walk with the Lord?

What part do our Brothers and Sisters in Christ have in helping in this process?

At the risk of "piling on", how important are past studies on understanding and using our Spiritual Gifts to help us cultivate others and be cultivated ourselves and-

Allow God to provide the Growth.
